Available on request

# Basaam Q

## Full Stack Developer

I have a passion for coding, being creative and problem solving I'm looking to develop a career in I.T, I'm looking forward to contribute my skills and innovations I'm also motivated in what I do. I'm looking to develop a successful career with you

## Experience

2024 - Present

### PookieBakes.com

Shopify Developer

Led the development of [passionbakes.org](https://passionbakes.org), a comprehensive e-commerce platform built from the ground up using shopify. Leveraged Shopify's capabilities resulting 25% increased sales by crafting a visually appealing and user-friendly website design. Implemented best practices to improve visibility and drive organic traffic to the site. Used data analytics tools to monitor website performance and track user behaviour to further enhance sales and conversion rate.

2021 - 2022

Dovelp.com, Luton

### web developer

I worked with the dovelp agency, where I worked with HTML, React developing websites from from photoshopped templates, I troubleshooted, problem solved and worked with a team, here I was mentored by my superiors, and was trained focusing on the MERN stack

2024 - Current

University of West London, London

### web developer

This is where I learnt How to use and built apps using Java, I also took web development courses, I developed an assistant for google translate and developed multiple project on kiteqio.com including a social app, the social app uses Php and Mysql for the backend.
